

Sports In The City

Contributors:

Reni Getskova - <https://github.com/ReniGetskova>

Miroslav Penchev - <https://github.com/mpenchev86>

Description:

This application is designed to help people find teammates for playing any sport they want to play, discover the closest facilities and their schedule for a particular date and time. Users can see who created the event and who has joined it. Users can create their own event or join an existing one.

Capabilities:

- Find facility's location for a particular sport on a map with pushpins
- View events for a particular date
- View events participants
- Join event
- Create new event
